From Eckernförde to Palma
German precision, now in the Mediterranean

20 Years Delivering Trusted Marine Engineering

- Engineered in Germany
- High-Performance HVAC for Yachts & Vessels
- Advancing Marine AMCS with Merlin
- Marine-Grade Electrical Panels – Robust & Class-Approved

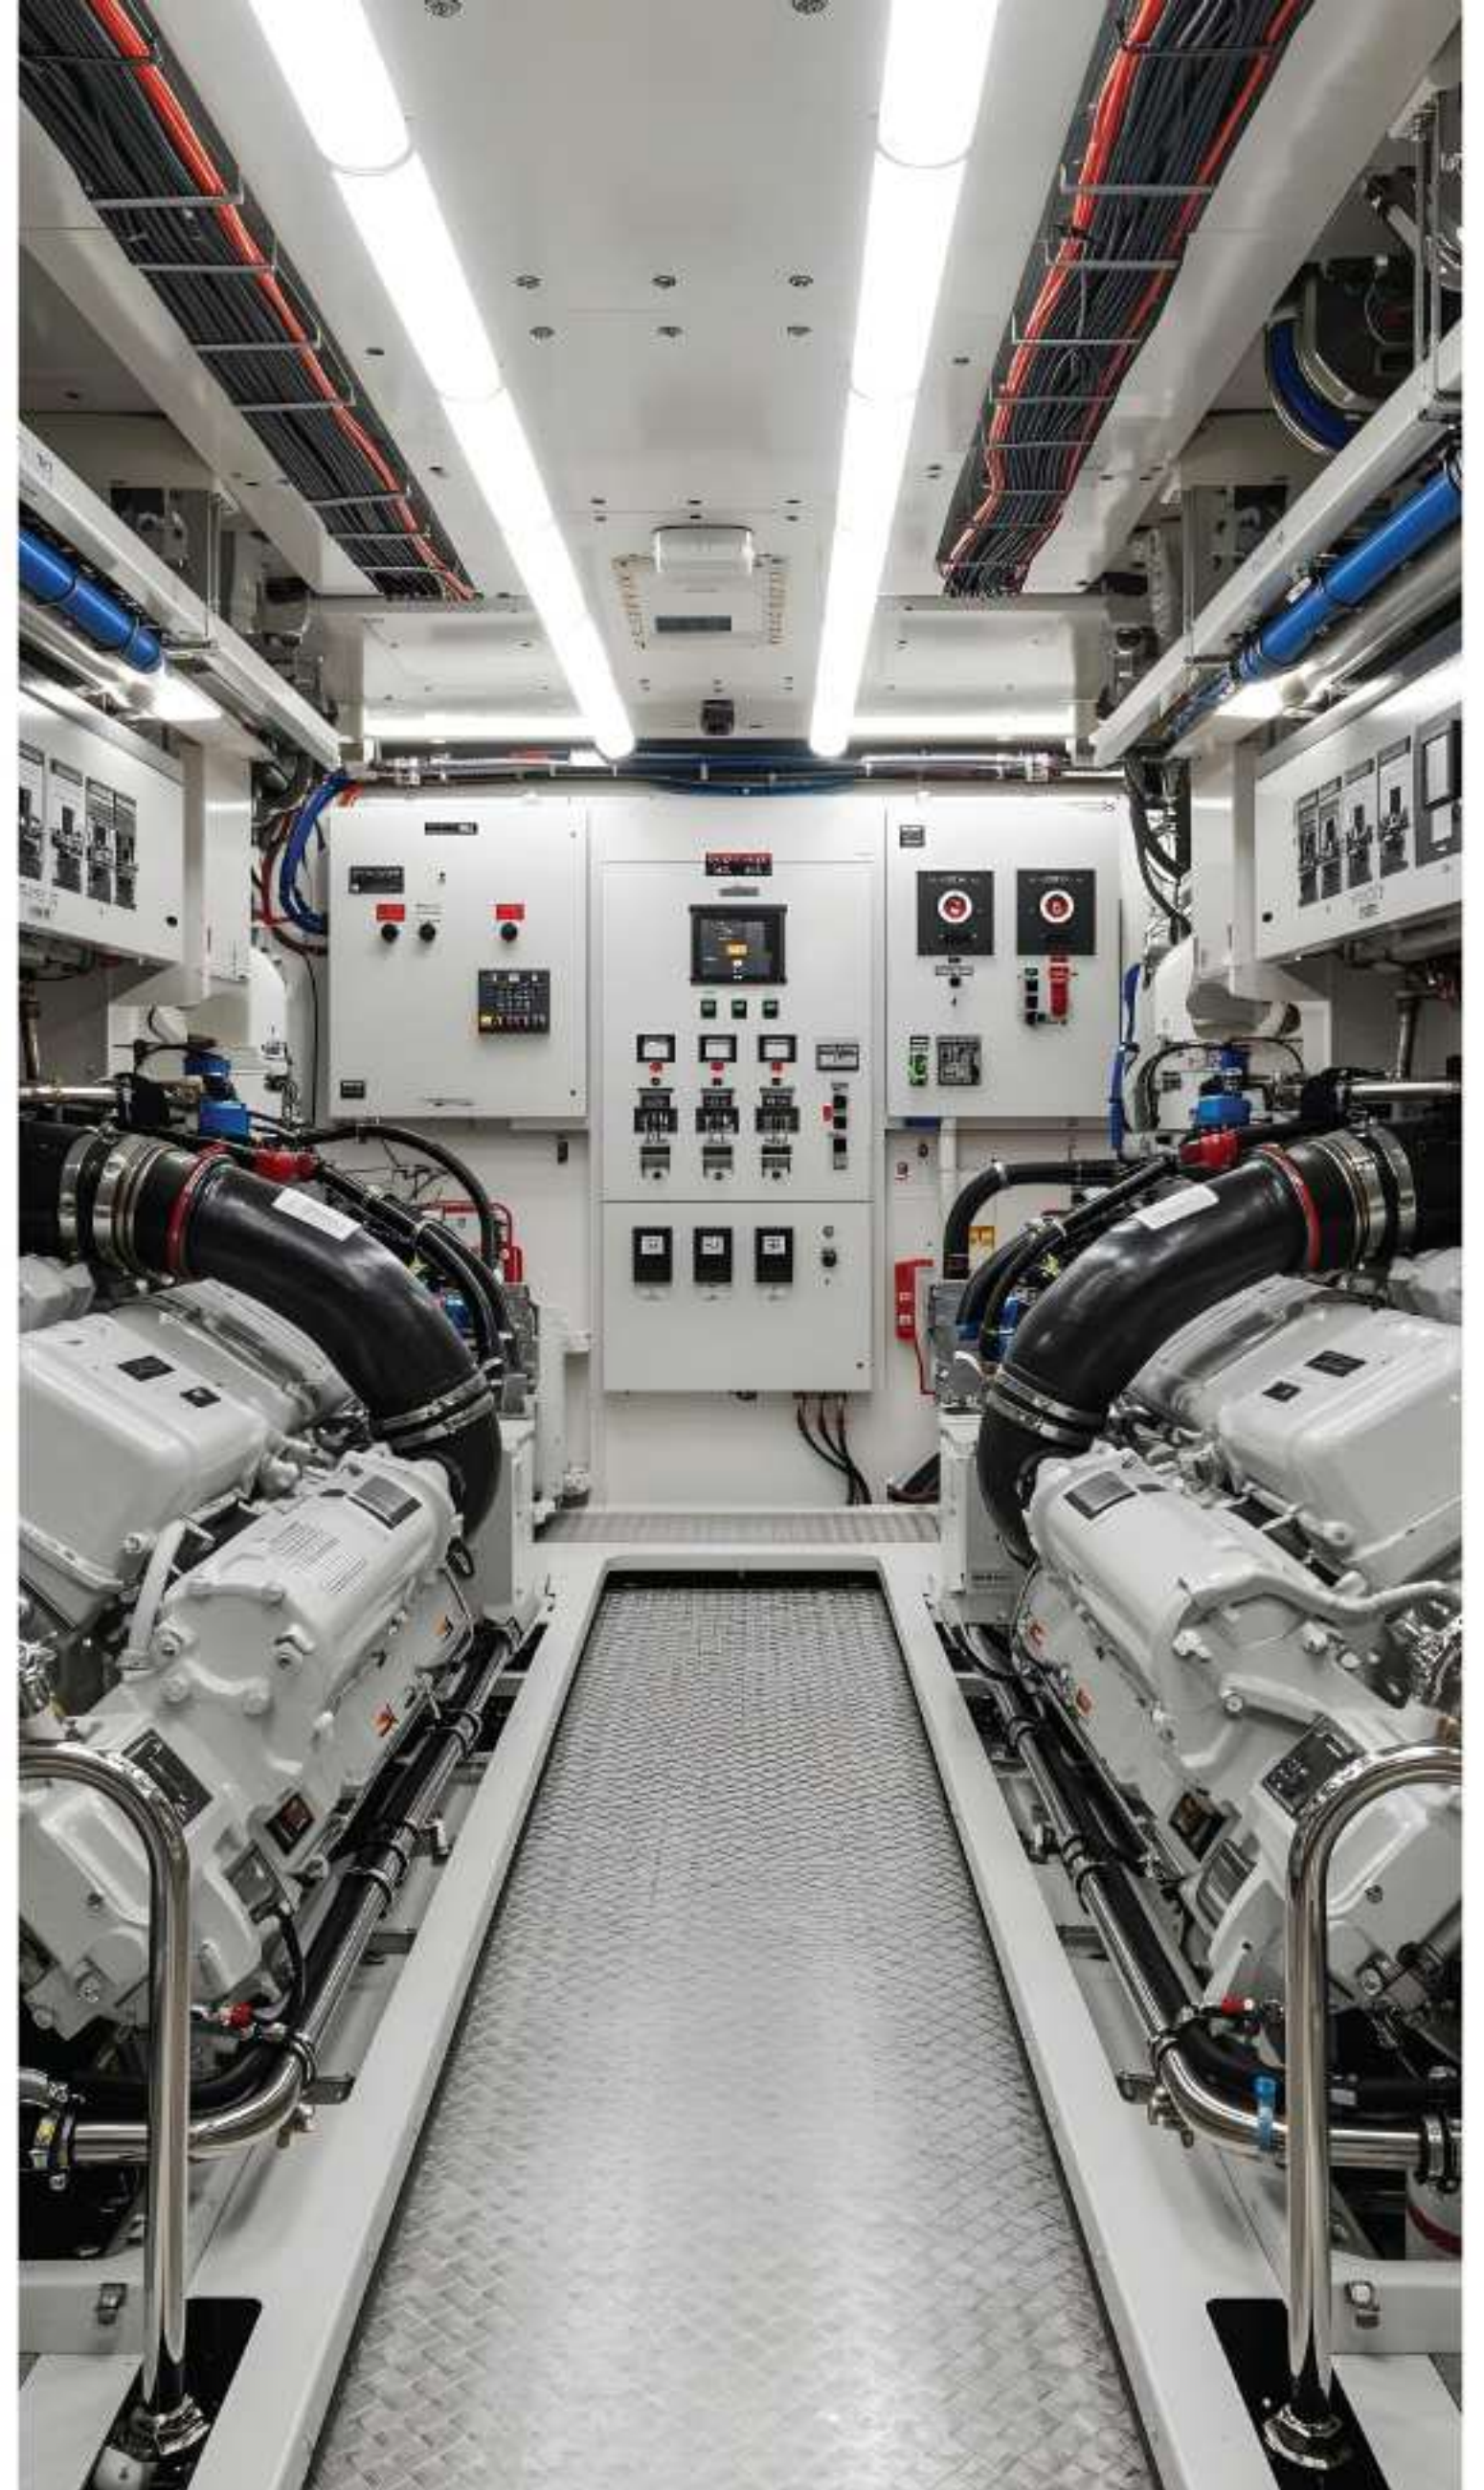

Who We Are

ROMV – German Marine Engineering Since 2005

For over 20 years, **ROMV** has been designing and delivering cutting-edge electrical and automation systems for yachts from our headquarters in Eckernförde, Germany.

Our team combines decades of hands-on experience with deep engineering expertise to provide tailor-made solutions for every vessel. We're known for our precision, quality, and reliability — from the initial concept to the final installation and beyond.

ROMV has worked on a wide range of projects, from advanced AMCS and PMS systems to custom-built electrical panels, HVAC integration, and full vessel automation. We understand the unique challenges of marine environments and deliver systems that are smart, efficient, and built to last.

ROMV Spain

Engineering Excellence in the Mediterranean

In 2025, **ROMV** expanded into the Mediterranean with the launch of **ROMV Spain**, based in Palma de Mallorca.

More than just a local office, **ROMV Spain** plays a key role in the full engineering lifecycle — from system design and panel production, to installation, FAT testing, diagnostics, and long-term support.

We bring:

- German-built systems + local agility
- Cross-border project coordination
- Fast response in key Mediterranean ports
- A solid bridge between engineering and operations

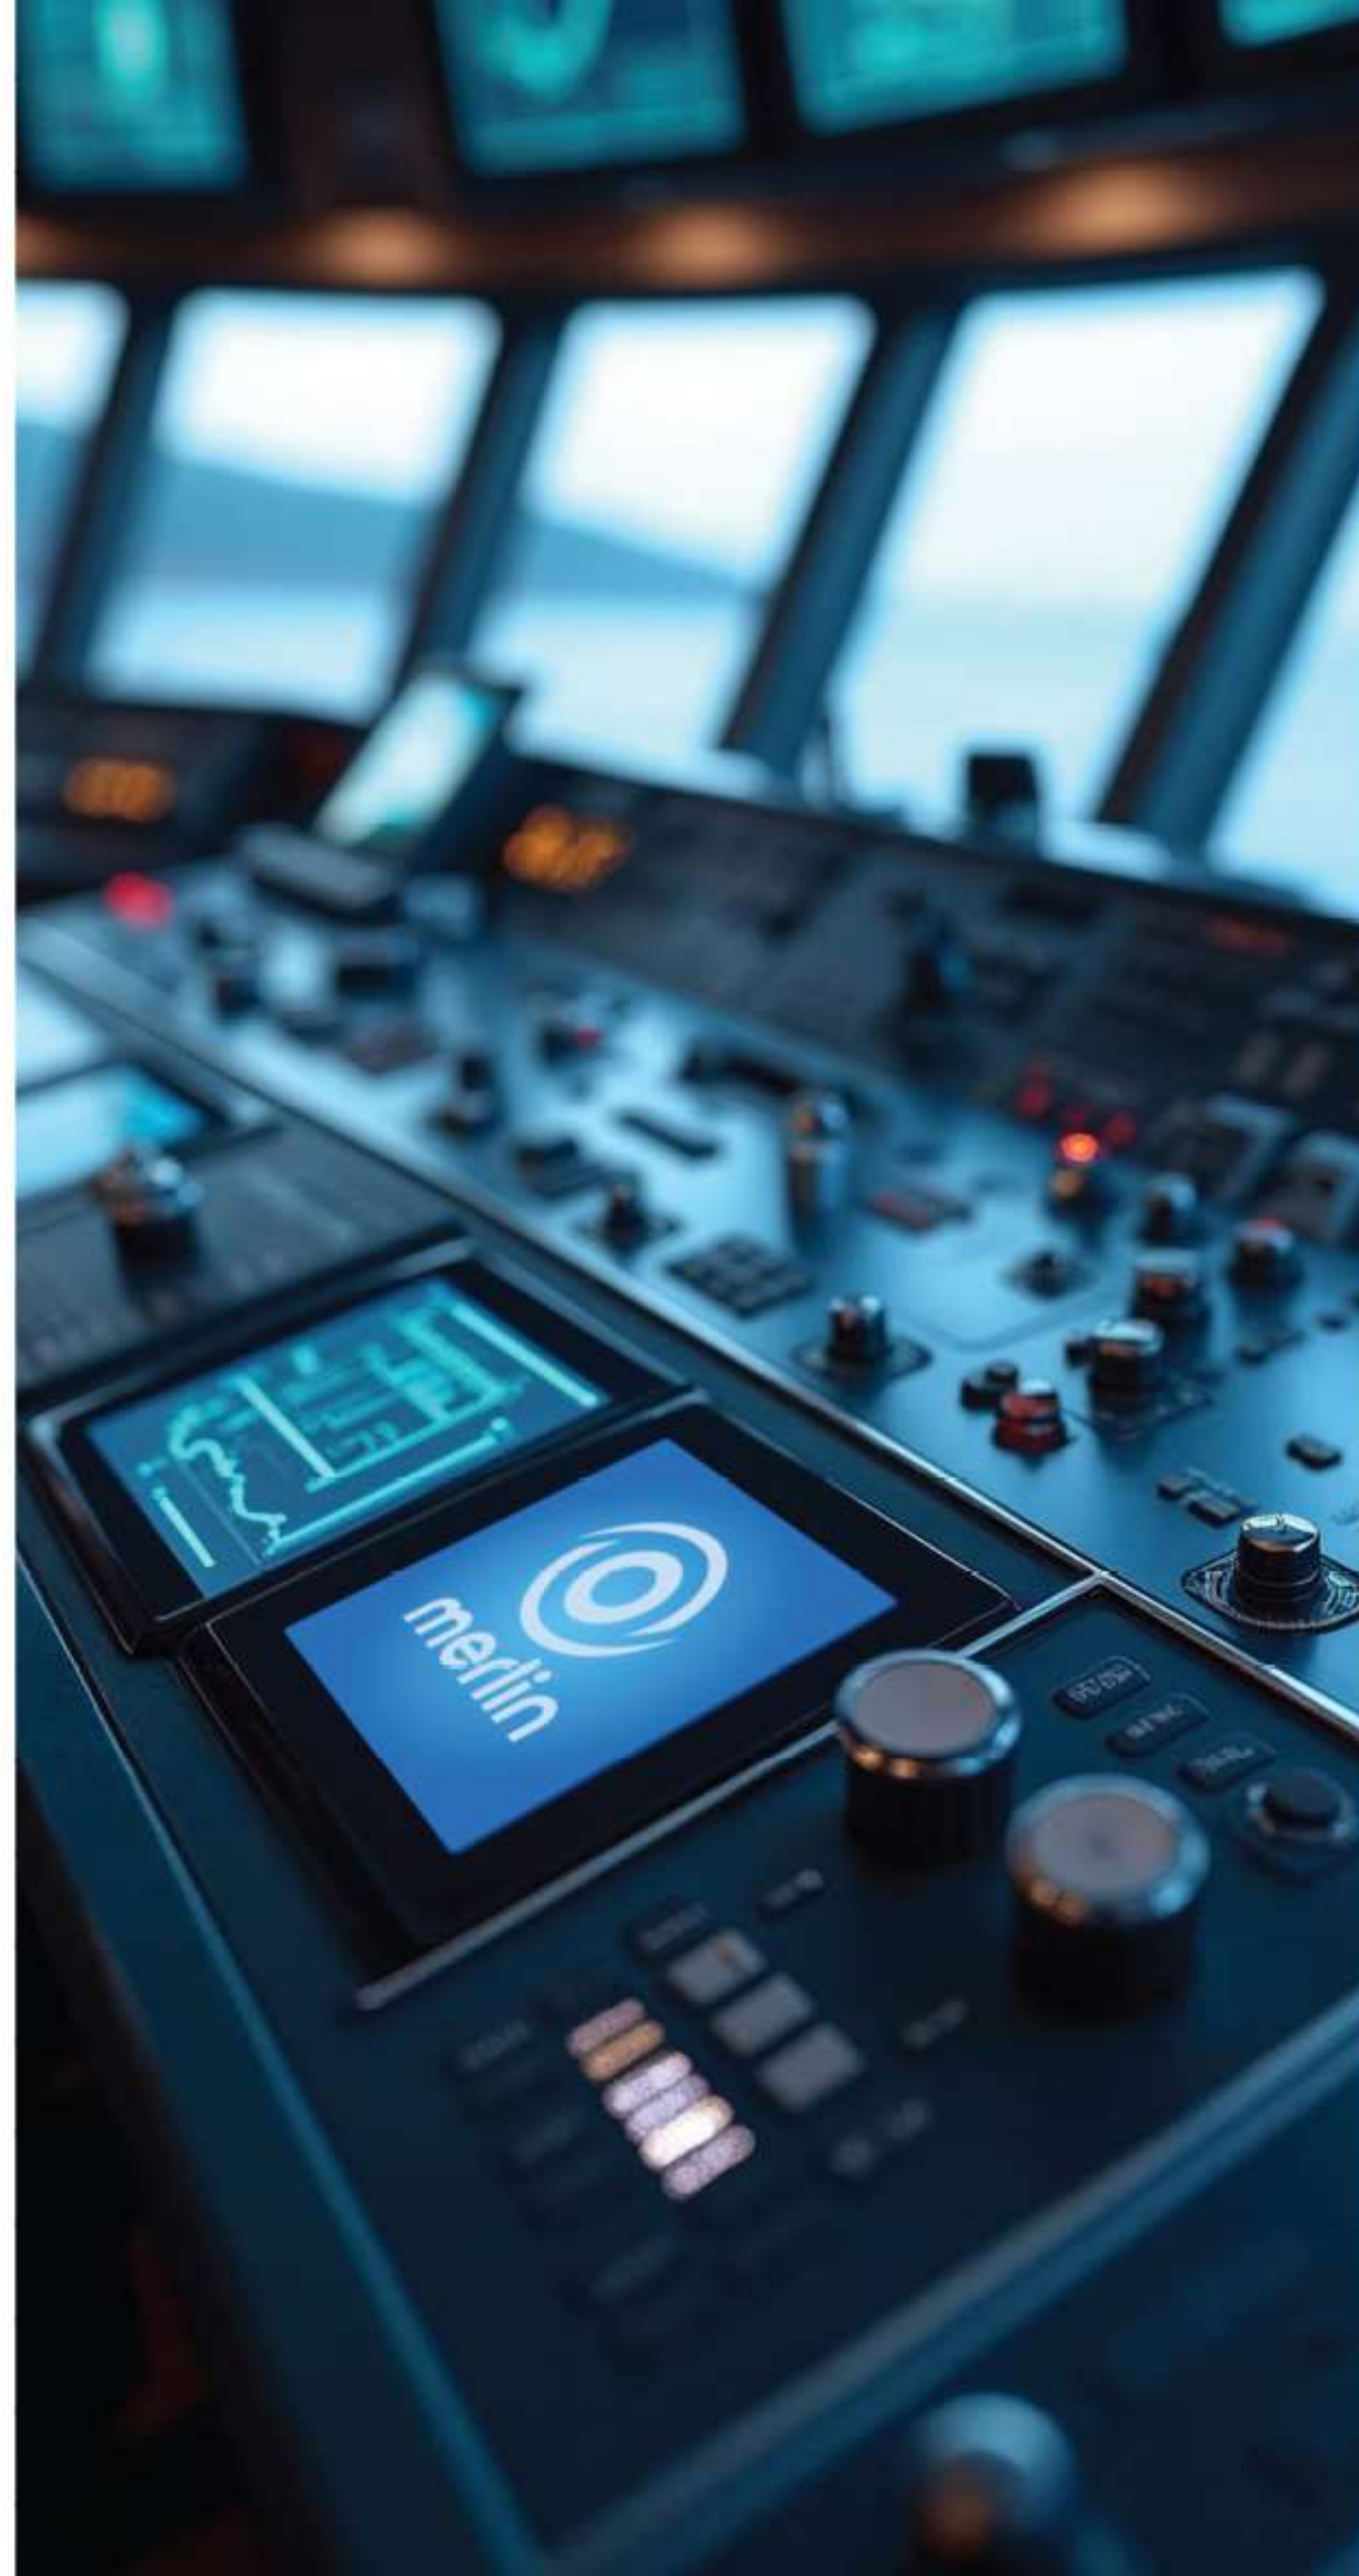

Wherever your vessel is, **ROMV** is ready to deliver.

Engineering

MERLIN – The Intelligent Core of ROMV Systems

- AI-powered diagnostics & analytics
- Predict failures before they happen. Understand your vessel's behaviour in depth.
- Unlimited signal & alarm capacity
- No restrictions on I/Os — scale freely with your project.
- Open architecture, zero lock-in
- Hardware-independent, future-proof software built on modern tools.
- **MERLIN** empowers captains, engineers and fleet managers with deep insight, control, and predictive capabilities.
- **MERLIN** is not just smart — it's a breakthrough AMCS redefining control and insight at sea.

What We Offer

Complete Engineering Solutions for Smart Yachts

From concept to commissioning, **ROMV** delivers powerful, integrated systems tailored for the most demanding vessels. Built in Germany, deployed in the Med.

Our Core Solutions:

- HVAC – Control & Energy Efficiency
- AMCS – Alarm, Monitoring & Control System
- PMS – Power Management System
- Electrical Panel Design & Manufacturing
- Fire Dampers Control Systems
- Air Room Climate Control
- Energy Consumption Optimization
- Lighting & AV Systems

Engineering Services & Support

Class surveys
(5/10/15 years)

Insulation Testing,
Power Analysis &
Earth Fault Detection

FAT / HAT
Certification

Insulation testing
& diagnostics

Advanced Battery
Discharge Testing

German-Made. Mediterranean-Deployed

- Engineered in Eckernförde, Germany
- Designed, installed & supported in Palma de Mallorca, Spain
